

ABC

Arithmetic doesn't always add up

Bisect, there's no need to get cut up about it

Cuboids, are as thick as a brick

Decimals, but where's the point?

Even Numbers, they're not odd

Fractions, just a little bit of this or that

Geometry shapes the world

Hypotenuse can confuse

Interest gets better all the time

Junction, it's coming together now

Kite, looks more like a toy

Linear, it goes straight down the line

Mode, it's a little bit common

Numerators got to the top

Oblique had to be listed

Per Annum, the birthday boy

Quotient has always been shared

Reflections – flipping things

Sums always add up

Tessellations are what joins us together

Uniform, constantly getting it right

Vertical, it drives me up the wall

Whole Numbers don't break-up

X is a cross

Y-axis doesn't suffer from vertigo

Zero simply means nothing to me
